DIMENSIONS

Optional Marketing Display

Route Management System

Real-Time Reporting

- Live view of all activity on both ticket redemption kiosks and video gaming terminals
- Dynamic reporting tools including Game Performance Dashboard
- Keep technicians alert with text and email alerts

Direct Kiosk Processing

- Process jackpots directly on the kiosk including automated W2G's and administer in RMS (TruCom®)
- Real-time alarms for over 300 configurable alerts
- Video gaming terminal configuration, performance, and auditing
- Drop/fill all kiosks and VGT's through the system
- Structure routes for cash fills and drops using the mapping feature

Tracking & Analyzing

- Track and inventory all components by serial number including life expectancy and depreciation
- Follow issues as they occur in the field and monitor corrective action
- Plan for currency needs using historic data
- Monitor all activity remotely on any mobile device (RMS Mobile Application)
