## AVP4.1v2 Quick Overview

AVP4.1v2 is the newer universal IGT logic box platform designed for use across multiple cabinet types including Cobalt 27, PeakCurve49, and Sierra27.

Feature	AVP4.1v2
Compatibility	Designed for multiple cabinet types
Video Card	Uses T1000 form factor matching AVP4.0+
Sierra27	Launch platform for Sierra27
Physical Size	Same form factor as AVP4.1 / AVP4.1RS2

### Important Upgrade Notes

- Older FPGA cabinet controllers require PCIe card.
- AVP4+ conversions require additional power/audio hardware:
  - Power Harness
  - USB Audio Amp Board
  - USB Audio Cable
- PCIe card (if using older cabinet controller)
